

# The Great Wall of Rescue Grain Entrapment Rescue Wall

KC Supply has released the latest design of entrapment rescue devices. The patent-pending "Wall of Rescue" is an evolution of rescue tubes.

- Unique, patent-pending design
- Durable #6061 grade aluminum is less likely to bend from usage or pressure
- Smooth mill finish easily slides thru most grains
- Ball-and-socket pivots allows unlimited shapes, sizes and angles
- Anodized joint reduces binding when connecting panels
- Simple installation by connecting ball from one section into the socket of another section
- Insertion step and extraction pipe aid in usage in extremely compacted products
- Adjustable to compensate for multiple victims or to work around obstacles such as cables
- Unlimited configurations by using one or any number of panels to create:
  - \* Round tube
  - \* Straight barrier wall
  - \* Curving, wavy, irregular shape
  - \* Horseshoe / C-shape
  - \* Can connect with other rescue dept's wall

## Six-Piece Wall Specs - per section

- Width = 16"
- Height = 60"
- Weight = 25 lbs
- Assembled Tube ID = Approx 30 inches
- Storage = 8" depth for six stacked pieces

## Carrying Bag:

- Durable, waterproof
- Handles on each end and each side for ease of carrying / lifting / storage

Patent-pending design utilizes a ball-and-socket joint to allow each section to pivot

## Rescue Auger

- Works with most rescue tubes
  - Direct Drive
