THE SIGNS OF A SAFE INDUSTRY

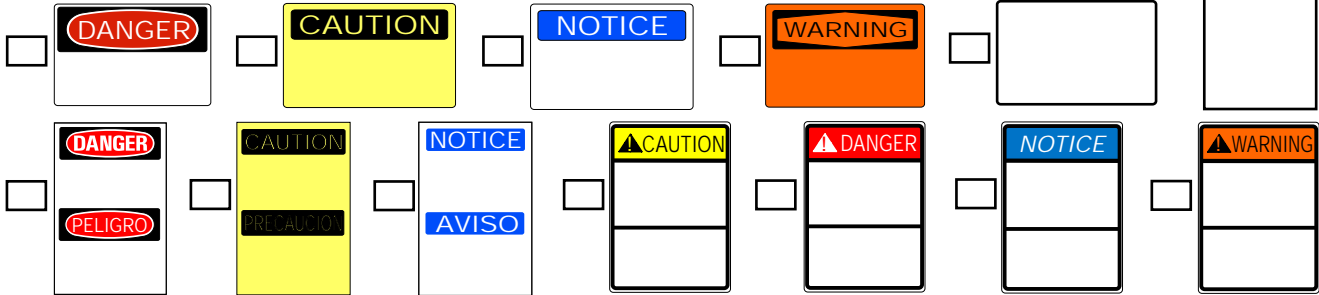

photocopy

You need a custom sign and have no idea what it will look like. No problem! We have produced custom signs from scribbled ideas on paper. One step better is to use the form below that will guide you through this easy process of making choices. After you fax in the completed form, we will send you a proof for you to review and approve.

 Company Name _____ Date _____
 Street Address _____ City _____ State _____ Zip _____

1 Select your sign style - Pick an OSHA heading, ANSI heading or no heading at all. Please select.

2 Select sign material - For outdoor long-term use, the best choice is aluminum. If outdoor use is short term (6-9 months), plastic is the best value. We offer fiberglass for two environments - highly corrosive and where the conduction of electricity is a concern. For indoor use, the most economical choice is our pressure-sensitive vinyl (smoother surface equals better bond). The next would be plastic. Still the most long lasting sign would be aluminum. Please select a material.
