Foot Protection

A quarter of a million disabling occupational foot injuries take place each year. The foot is especially vulnerable to injuries such as compression, puncture, slipping, chemicals, extreme heat, cold and wetness. OSHA CFR 1910.136(a) states, "Each affected employee shall wear protective footwear when working in areas where there is danger due to falling or rolling objects, or objects piercing the sole, and where such employee's feet are exposed to electrical hazards."
