

# Glow Signs

## THE SIGNS OF A SAFE INDUSTRY

All exit signs need to be illuminated- either internally by a light source or by an external source. A luminous sign by itself does not meet the NFPA standard.

### Phosphorescent Glow Signs

Made of high-quality photoluminescent materials, the signs glow brightly in total darkness. Without fail these signs provide guidance each time the lights go out. Escape routes and the location of life-saving equipment can be clearly marked. These signs do not require electricity. The degree of brightness depends on the area covered, the distance from the light source and the nature and duration of the room illumination.

### Material

Material is non-toxic and non-radioactive. These sign pigments absorb and store the energy contained in daylight or artificial light. When it is dark, stored energy is released in the form of green luminescence.

### Phosphorescent Glow Floor Markings

2" GL-99024-2 (100/Roll)  
3" GL-99024-3  
4" GL-99024-4 Self-adhesive Rolls

Both Floor Markings Available in 2", 3", 4"

2" GL-99044-2 (100/Roll)  
3" GL-99044-3  
4" GL-99044-4 Self-adhesive Rolls
